ENVIRONMENTAL POLICY

ISO 9001

Page 1

KAN Sp. z o.o. is an experienced Polish producer and supplier of KAN-therm installation systems. The company has a conscious approach to the Integrated Environmental Management System in line with the requirements of ISO 9001:2015 and the implementation of the Environmental Policy.

Main objectives:

1. Continuous improvement of the effectiveness of the actions related to control and prevention of the negative impact on the environment.
2. Minimisation of the negative environmental impact through the management of technological waste in an environmentally safe manner, as well as proper segregation, storage, and transfer of waste for recycling or recovery.
3. Supervision of the proper storage of chemicals necessary during production.
4. Rational management of raw materials and supplies.
5. Controlling the consumption of water, electricity and heat.
6. Undertaking continuous efforts to improve the impact on the environment.

KAN Sp. z o.o. executes the above resolutions through:

1. Compliance with applicable environmental laws and rules.
2. Improvement of modern technology and technological processes so they are environmentally friendly and meet the needs and expectations of current and future customers and other stakeholders.
3. Providing employees with adequate working conditions and resources for the continuous development and modernisation of production.
4. Gradual improvement of occupational health and safety of the employees through constant control of environmental aspects.
5. Carrying out regularly planned maintenance works and minimising the negative impact on the environment related to the use of vehicles, machines, equipment and buildings.
6. Transferring waste to companies that conduct zero-emission activities.

This Environmental Policy is known, understood and implemented by the employees of KAN Sp. z o.o.
